

# WATERFRONT ASSETS

Waterfront assets are defined as places or things where economic, environmental, and social functions of communities take place, or critical infrastructure is required to support these functions. One component of the CLEAR Initiative is to identify key waterfront assets that may be at-risk for flooding and erosion as well as overall variable lake levels and conditions along the Monroe County waterfront. A list of potential assets to be identified by the community include:

## ASSET CATEGORIES

### ECONOMIC

- Downtown Center
- Small Business
- Employment Hub
- Lodging
- Industrial, Manufacturing + Warehousing
- Restaurants
- Bank + Financial Services
- Marina + Water Based Business
